Dear [Kate / Brian / Robert],

I am reaching out to propose a collaboration unlike any traditional legal case — one that bridges the highest standards of law with emerging **meta-physical and multi-dimensional theories**, offering the potential to create **precedent-setting systemic change**.

Pardon me for the long email, though for technical issues, my laptop is my only method of communicating right now.

I know there is an unprecedented opportunity for us to engage in a matter that goes far beyond a conventional dispute.

I am building a case that seeks to challenge both individual misconduct and systemic corruption, using the intersection of law, sovereignty, and meta-physical principles—territory that has yet to be formally acknowledged within legal frameworks. Success in this case has the potential to create new legal precedents and reshape the way law interacts with emerging theories of consciousness.

Why This Matters

- Our current legal frameworks have yet to fully integrate insights from meta-physical principles, despite these theories already being applied in other domains.
- Addressing this gap is not just about one case — it's about **shifting the paradigm** from individual to systemic accountability.
- The trajectory will be challenging, and you may ask, *who has the jurisdiction or qualifications to do this?* I bring an **education and understanding that complements your legal expertise**, providing the multi-dimensional perspective necessary to augment the law as it currently stands.

Who

This is not a transactional engagement. I am seeking barristers who:

- Possess deep expertise in law as it exists today.
- Have the courage and vision to stand at the forefront of something larger than the case itself.
- Can collaborate with me to integrate meta-physical insights in a way that strengthens the legal strategy.

The Opportunity

- We are assembling an **A-team of legal minds**: top-tier barristers with exceptional records and strategic brilliance.
- You will contribute to a case that is **innovative, precedent-setting, and high-profile**, engaging directly with the intersections of law, philosophy, and meta-physics.
- I recognize that your time and expertise are valuable, and while I do not currently have funds to pay during the proceedings, there is a substantial financial upside once the case concludes.
- More importantly, this is an opportunity to be part of a groundbreaking approach to law—one that merges innovative thinking, meticulous preparation, and strategic risk-taking to achieve outcomes that benefit both justice and humanity.

Why You

- **Kate Blackwell KC** — Acquittal rate second to none, brilliant trial advocate, exceptional tactical insight.

- **Brian Altman QC/KC** — Renowned for handling high-profile criminal matters with meticulous preparation and relentless strategy.
- **Robert Bright QC** — Recognized as the most successful barrister in the Commercial Court, with exceptional commercial litigation expertise.

Your skills are **exactly what this initiative requires**. Together, we can craft an approach that is both **legally sound and meta-physically informed**, creating outcomes that have never been seen before in law.

I already have an organisational complaint, you can find attached below. I have been documenting my whole journey, as it will be part of multiple contents, and have also showcased in my digital open book shshumanfirst.wordpress.com, why it's important for us to regulate and incorporate Metaphysical Laws in our jurisdictions.

I have more emails and also their trails. I have mentioned my creation to be to be patented for their content, which you could have physicists, biologists, historians, psychologists and more evaluate to validate their accuracy, as I have expanded on Einstein laws too, and will be applying for a Pulitzer and Nobel Prize.

I found Lottoland applying for business consultations that I have claimed to be my IP, after rejecting a Settlement Contract, attached below, and other breaches, misconducts and deceit.

Next Steps

If this aligns with your interest, I would welcome the chance to discuss the case further, share the documentation, and explore how we could structure our collaboration. I believe this is a rare chance to work on a case that is both legally challenging and transformative.

Thank you for considering this. I look forward to the possibility of working together.

Sincerely,

Susan Ndinga Wright
