

# Dimensions Mastery: The Only Dance We Need to Master

## Projection & Reflection

### Ascension & Descension

We ascend from 0D to 4D, harmonious expansion is found in descension for the next ascension Ethereal experience of 0D to 4D (Manifested as 5D to 9D). Cyclical. Physical & Meta. Death & Life.

Finiteness Ends in a finite Perception, as expansion within a finite Macro is infinite.

Stages of our State

1. The State - 0 Dimension
2. Vegetable State - 1<sup>st</sup> Dimension
3. Animal State - 2<sup>nd</sup> Dimension
4. Creative State - 3<sup>rd</sup> Dimension
5. Observing State - 4<sup>th</sup> Dimension

Interdependence is to depend on one's inner through selves. The core to everything, a relationship between two, a meeting between a team, the core of oneself. The focusing on the merger releases pressure on the components, which will self-allocate upon instruction of relationship's expectations to sustain time x space, shaping it in the Now.

To Ascend and Descend isn't to break a loop, it's to follow a spiral, which appears as up/down from the side, a circle from the top (Perception of running in circles - 2D and a spiral from sideways - 3D).

Balance = Reflection of Harmony

Harmony = Projection of Balance

### The Planes & Octaves of Existence

#### Perceived and Expressed Planes

- Wholeness per 6/planes - Ability to Be
- Vision: " What do I make of this wholeness? " to Micro & Macro - Ability to dream/imagine/visualise/Change
- Embodiment: " Who do I be for the Vision? " - Ability to Discern
- Nurture: " What's Desired? " - Ability to Acknowledge
- Truth: " What's Needed? " - Ability to Accept
- Harmony: " What's Next? " - Ability to Expand integrated in multidimensional Completion

#### Octave of Experience = Dimension

- 0D ; 0D<sup>2ND</sup> = 5D ; 0D<sup>3RD</sup> = 10D ; 0D<sup>4TH</sup> = 15D
- 1D ; 1D<sup>2ND</sup> = 6D ; 1D<sup>3RD</sup> = 11D ; 1D<sup>4TH</sup> = 16D
- 2D ; 2D<sup>2ND</sup> = 7D ; 2D<sup>3RD</sup> = 12D ; 2D<sup>4TH</sup> = 17D
- 3D ; 3D<sup>2ND</sup> = 8D ; 3D<sup>3RD</sup> = 13D ; 3D<sup>4TH</sup> = 18D
- 4D ; 4D<sup>2ND</sup> = 9D ; 4D<sup>3RD</sup> = 14 ; 4D<sup>4TH</sup> = 19D

### Expansion Degrees

#### In Perception and Expression

- 0D = No Expansion ( i.e. To be aware, we can develop what we're aware about, why we're aware and how, but not that we are. )
- 1D = Gravitational Expansion ( i.e. Perfect Circumstances )
- 2D = Physical Expansion ( i.e. Body Evolution )
- 3D = Mental Expansion ( i.e. Death & Birth of Perceptions )
- 4D = Emotional Expansion ( i.e. Emotional Parent Thy = Empathy )
- 5D = Public Expansion ( i.e. Our Social Networks ) - For how Perceived / Given
- 6D = Spiritual Expansion ( i.e. Connection with Consciousness and its bridges i.e. Gods/Angels/Synchronicities/prayer/.. ) - For how Expressed / Received
- 7D = State of Expansion Integration ( i.e. Relationship with Matter )
- 8D = State of Expansion Multi-Dimensionality ( i.e. Relationship with All )
- 9D = State of Expansion Completion - ( i.e. Relationship with Endings )

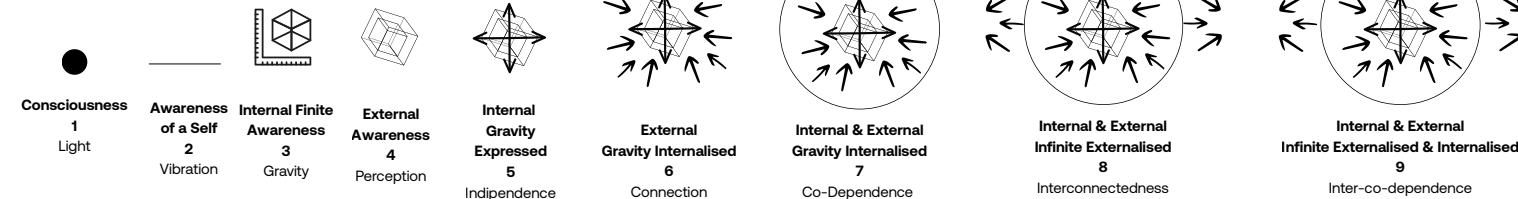

#### Reflections

- 0D to 6D are State of Perception " Have "
- 7D to 9D are States of Expression " Experience "
- When the finite and the infinite match vibration, Completion happens.
- One must know and recognise their one's wholeness, to know when/which of its aspects are expanding.
- Space is finite, Expansion is infinite.
- Desired x its Sustainability
- To expand Healthily, is to expand Multi-dimensionally in 5<sup>th</sup> dimensionality, to expand in our expression of self. The channeller of Infinity.
- Projection = Expansion of the Inner
- Reflection = Expansion Expanding in the outer
- A & B stay in the exact same place, but the journeys differ on expansion Needed & Gained, as the different dimensions of travel, will unlock paths in alignment with the level of multidimensionality travelled.

### Multi - Dimensionality Explained

- Each Dimension is found within the other
- Consciousness is finite, as doesn't need bounds to experience itself - Non Local as it just is.
- Expansion is infinite, the bounds is on the frequency - tuned to harmony
- When 0D to 4D is grounded in 15D to 19D, the 5D to 14D is balanced & harmonious for all
- When Balance is achieved, between the illusion of finality and infinity, then and only then the dimensions become 10 instead of 20(0Dto4D merged with 10Dto14D & 5Dto9D merged with 15Dto19D)
- Balance then becomes about crafting infinite selves, for however long we find purpose in it.
- Gravity = **Perception** = Creating Agent
- Vibration = **Expression** = Creation
- The higher the vibration:
  - The higher the perception of finality/Death, with opportunity of Life
  - The higher the expression of Birth/Infinity, with consideration of Death
- **Infinity** is the Fact-Checker " Does it withstand Infinity? " or " Is it harmonious throughout Infinity? )
- The goal is to keep expanding without death. We must create systems reliant on infinity, to avoid physical Death, as the physical only houses the projected ethereal.
- **Conductivity** is firm bounds, fluid in movement.
  - "What's fluid is strong, as it never brakes. It temporally separates to reunite wiser"
- **Speed of Light** is found when all 20 dimensions are experienced in the 5 dimensions.
- When we don't express in the wide / to the Source of our experienced Effect, we rid ourselves of the validation
- When we don't Perceive wider to a Cause, we ride ourselves of the acknowledgement of Self
- We just needed to agree on a container for infinity to unravel itself.a
- **Vibration** is the Lightest Expression calculable
- **Gravity** is the Lightest Perception calculable
- **Light** = 0D - Infinite Self
- **M** = 1D - Infinite made Finite [ Self \* State of Self ]
- **V** = Octave of Existence / State of Self
- **Immortality Conceptualised**: We have to see each other as Infinite Consciousness to unlock further embodiments of consciousness. We hold Immortality in perception until the body reflects it
- We Divide to Reunite, not to expand in division. To gather differences to expand in unity

Everything is a frequency's benchmark/vibration (Hz) Sound, Small Touch, are different frequencies of experience/touch as they are perceivable when their frequencies touch the tool to perceive them, if you expand the frequency, you expand the senses experienced.
